# Match Predictor

**Run on your computer (Python 3.10+):**

```
pip install -r requirements.txt
streamlit run app.py
```

**Put all files in one folder. The app downloads free results from football-data.co.uk the first time you open a league, then caches them for 6 hours.**

**Leagues: England (5 divisions), Spain (2), Germany (2), France (2), Netherlands, Turkey, Norway, Mexico.**
